

COPPER 31 – WELL DRILLING LUBRICANTS

SPECIFICATIONS:

- Copper 31 is the most commonly used lubricant in the U.S. oil drilling industry.
- It provides a more reasonably priced option equal to Jet-Lube 21®.
- Several container sizes are available for convenience.
- The high-quality compound performs in temperatures as low as +15°F.
- The lube contains no-lead or zinc and has a high copper content.

No Lead
