

# COPPER LUBE – WELL DRILLING LUBRICANTS

## SPECIFICATIONS:

- Copper lube is the most commonly used lubricant in the U.S. oil drilling industry.
- It provides a more reasonably priced option equal to Jet-Lube® Kopr-Kote®.
- Several container sizes are available for convenience.
- The high-quality compound performs in temperatures as low as -49°F.
- It includes extreme pressure additives, ensuring durability under tough conditions.
- The lube contains no-lead or zinc and has a high copper content.

No Lead
