

QUALITY SUMP PUMP CHECK VALVES

SPECIFICATIONS:

- Featuring compression (SLIP) connections, our quality sump pump check valves come complete with clamps for a secure and easy installation.
- Built for long-lasting durability, these valves are **fully repairable in the field**, allowing for convenient maintenance and extended use.
- Their full-flow positive sealing design ensures efficient operation while preventing backflow, protecting your sump pump system from potential damage.
- Made from heavy-duty, durable thermoplastic, these check valves are built to withstand demanding conditions.
- Designed specifically for vertical installation, they ensure optimal performance within your system.
