

# M64 SERIES - CLAMPS

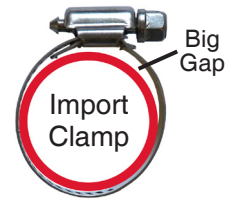

## ALL STAINLESS STEEL - 3/8" HEX HEAD SCREW

### SPECIFICATIONS:

- Each component is made from high-quality stainless steel, including the 1/2" wide 300 Series all stainless steel band, high torque housing, and 3/8" hex head screw.
- Unlike imported clamps, which may cause leaks due to their irregular shape and crimped, wider, weaker housing, Merrill clamps maintain a perfectly round shape inside the band of the clamp. This ensures a secure fit and reduces the risk of leaks.
- Merrill clamps have stronger housing that allows more torque on band, providing a tighter fit and seal to insert.
- The M64 Series offers a larger size range, ensuring that the clamps open and close efficiently to fit various application, whereas imported clamps may not open wide enough or close tightly enough. These marine grade quality clamps are designed to meet the demands of underground and underwater applications. No magnetic attraction is found in Merrill clamps, unlike some competitors'.
- Although Merrill clamps may be priced higher than imported clamps, their round design and accurate size range ensure reliable and effective performance.
