

MANIFOLD BRACKET – WITH 2 CLAMPS AND BOLTS

SPECIFICATIONS:

- Use only the best when installing a manifold for variable speed pumps.
Only Merrill provides all the features and benefits – clearly the best.
- The one-piece manifold bracket supports the entire manifold.
- It is easy to level, allowing a quick installation.
- The bracket doubles as a tool shelf during installation, a feature not possible with other brackets.
- It provides silent installation with foam blocks and rubber covered clamps, making it the only bracket with foam blocks to eliminate vibration and ensure silent installation.
- The improved foam blocks are thicker and firmer for better performance.
- The stainless steel manifold clamps has been improved with rubber cover stainless steel for added durability.
- Edge protectors are included on the front of the bracket for extra safety.
- The bracket is power coated for extra corrosion protection.
- The complete set of bolts and lag screws includes 4 lag screws and 4 sets of bolts with nuts for both 1-1/4” and 2” manifolds. Additionally, the set contains 2 sets of XL bolts specifically for the 2” manifold.
