

PARTS KIT “BF” PKBF

B-7000 SERIES

SPECIFICATIONS:

- PKBF is a parts kit designed for B-7000 yard hydrants. It includes a lifting strap, lever bolt, clamp bolts, nuts for clamp bolts, and top and bottom plunger O-rings.
- One lifting strap with a simple ribbed design that greatly increases strength, and a centered single strap eliminates side pull.
- The plunger seal is easy to replace by loosening one bolt, and the O-ring can be quickly replaced when the plunger is lifted out.
- Swivel parts permit withdrawal of the rod and plunger without ever digging the hydrant up.

No Lead

PARTS KIT DETAILS
