

PARTS KIT “B” PKB

M-2000 SERIES

SPECIFICATIONS:

- PKB is a parts kit designed for M-2000 yard hydrants. It includes draw straps, pivot connectors and nuts, packing nuts, valve stem packings, stainless steel rod stems, rod connectors, plungers, and O-rings.
- Draw straps are made of high-strength 1040 hot-rolled steel reduces wear and eliminates side pull on the operating rod, resulting in longer life.
- Pivot connector and nuts replaces set screws, that tend to be unreliable. This results in years of easy reliable adjustments.
- The stainless steel rod stem is polished, which will not cut the Teflon™ packing and packing nut, resulting in longest operating life.
- Self-lubricating plunger prevents rubber from bonding to the valve body, with the longest operating life in a one piece design.
- Swivel parts permit withdrawal of the rod and plunger without ever digging the hydrant up.

PARTS KIT DETAILS		
Part No.	Description	Qty.
G-20	Draw Straps	3 Pr.
G-25	Pivot Connectors & Nuts	2
G-30	Packing Nut	3
G-35	Valve Stem Packing	3
G-45	Rod Stem	2
P-50	Rod Connector	3
P-115	Plunger	3
OR110	O-Ring	3

MATERIALS LIST	
Part Name	Material
Draw Straps	1040 Rolled Steel
Pivot Connectors & Nuts	Zinc Plated Steel
Packing Nut	Brass
Valve Stem Packing	Teflon™
Rod Stem	Stainless Steel
Rod Connector	Steel
Plunger	Brass and Ethylene Propylene
O-Ring	Buna
