

PARTS KIT “EF” PKEF

E-5000 SERIES

SPECIFICATIONS:

- PKEF is a parts kit designed for E-5000 yard hydrants. It includes a hex head bolt, draw straps, pivot connector, packing nut, packing gland, O-ring, valve stem packing, and plunger.
- Pivot connector and hex head bolt replaces set screws, that tend to be unreliable. This results in years of easy reliable adjustments.
- Draw straps are made of high-strength 1040 hot-rolled steel reduces wear and eliminates side pull on the operating rod, resulting in longer life.
- The tough packing gland allows for quick plunger removal, reducing the time needed for replacement.
- Self-lubricating plunger prevents rubber from bonding to the valve body, with the longest operating life in a one piece design.
- Swivel parts permit withdrawal of the rod and plunger without ever digging the hydrant up.

No Lead

PARTS KIT DETAILS		
Part No.	Description	Qty.
C-5	1/4" Hex Head Bolt	1
G-20	Draw Straps	1 Pr.
B-25	Pivot Connector	1
C-30	Packing Nut	1
C-31	Packing Gland	1
OR116	O-Ring	1
C-35	Valve Stem Packing	1
C-115	Plunger	1

MATERIALS LIST	
Part Name	Material
Hex Head Bolt	Stainless Steel
Draw Straps	1040 Rolled Steel
Pivot Connector	Zinc Plated Steel
Packing Nut	Plastic
Packing Gland	Plastic
O-Ring	Buna
Valve Stem Packing	Teflon™
Plunger	Brass and Ethylene Propylene
