

PARTS KIT “EM” PKEM

EM-5000 SERIES

SPECIFICATIONS:

- PKEM is a parts kit designed for EM-5000 yard hydrants. It includes hex head bolts, draw straps, pivot connectors, metal packing nuts, metal packing glands, O-rings, valve stem packings, and plungers.
- Pivot connector and hex head bolt replaces set screws, that tend to be unreliable. This results in years of easy reliable adjustments.
- Draw straps are made of high-strength 1040 hot-rolled steel reduces wear and eliminates side pull on the operating rod, resulting in longer life.
- The tough packing gland allows for quick plunger removal, reducing the time needed for replacement.
- Self-lubricating plunger prevents rubber from bonding to the valve body, with the longest operating life in a one piece design.
- Swivel parts permit withdrawal of the rod and plunger without ever digging the hydrant up.

PARTS KIT DETAILS		
Part No.	Description	Qty.
C-5	1/4" Hex Head Bolt	4
G-20	Draw Straps	3 Pr.
B-25	Pivot Connector	2
C30-ZPS	Metal Packing Nut	3
C31-ZPS	Metal Packing Gland	3
OR116	O-Ring	3
C-35	Valve Stem Packing	3
C-115	Plunger	3

MATERIALS LIST	
Part Name	Material
Hex Head Bolt	Stainless Steel
Draw Straps	1040 Rolled Steel
Pivot Connector	Zinc Plated Steel
Packing Nut	Zinc Plated Steel
Packing Gland	Zinc Plated Steel
O-Ring	Buna
Valve Stem Packing	Teflon™
Plunger	Brass and Ethylene Propylene
