

PITCHER PUMP – PUMP125 (ORIGINAL DESIGN)

SPECIFICATIONS:

- The original cast iron pitcher pump is designed for shallow well applications, with a maximum lift capacity of 25 feet.
- It features an adjustable cap to accommodate different handle positions, and a spout with an indent for supporting a pail handle.
- Cup leathers are used on the inside cylinder, along with a leather cup seal at the bottom.
- Each pitcher pump is individually boxed.
