

PITCHER PUMP – PUMPHD125 (BETTER INTERNAL PUMP)

SPECIFICATIONS:

- The pitcher pump features a heavy-duty cast iron body with an internal pump cylinder.
- It includes replaceable internal components for easy maintenance and long-lasting performance.
- A molded rubber flapper seal and molded rubber cup seal ensure efficient water flow and a secure, reliable seal.
- Designed for shallow well applications, the pitcher pump supports a maximum lift capacity of 25 feet.
- The longer-life pump cylinder components enhance both performance and durability over time.
- Each pitcher pump is individually boxed.
