

# TANK TEES – SCHEDULE 120 PVC

## SPECIFICATIONS:

- The tank tee connects the water line from the pump to the pressure tank plus all the extra tapings needed to complete the installation.
- PVC Tank Tees are available in two lengths: 5” and 6”.
- Tank connection options include 1” FIP and 1” MIP, with a 1” FIP lateral pipe connection to and from the tank.
- Other tapings include one or two drain holes, available in either 1/2” or 3/4” sizes.
- The heavy-duty body is made from schedule 120 PVC coupling material, which is machined rather than molded for added durability.
- A reinforcing Schedule 40 sleeve is installed across the inside of the tee connection, providing superior strength at the joints of the heavy-duty PVC tees.
- **NOTE: Other sizes of tees and configurations can be made per request.**
