

SHALLOW WELL AIR VOLUME CONTROLS

SPECIFICATIONS:

- Designed for use in shallow wells and water tank systems, it is also compatible with submersible pumps.
- Made from durable materials, it ensures long-lasting performance, while brass internal operating parts minimize corrosion.
- A pressure-tested plastic float provides a long operating life and helps maintain the balance of air volume in galvanized water tanks for shallow well applications.
- The Ametek brand model is furnished with a 48" air tube and fittings.
- Its body has 1-1/4" pipe thread and includes a 1/4" tap for a gauge.
- Each shallow well air volume control is individually cartoned.

No Lead

MAX PRESSURE RATING

- 100 PSI

DIMENSIONS						
Part No.	Brand	Air Tube Size	Length in.	W in.	H in.	Approx. Wt./Lbs.
SWL	Ametek	48"	11.40	2.50	2.40	0.9

MATERIALS LIST	
Part Name	Material
Housing	Zinc Die-Cast
Air Inlet Valve	Brass
Rod	Brass
Mini Barb Adapters	Brass
Float	Plastic
Plug	Neoprene
Tubing	Polyethylene
